

Signs of Spring

The frosty days of winter gradually disappear as days get longer and we move into spring. At this time, signs of change of season begin to appear and can be seen in the parks and green spaces in Chelmsford and surrounding areas. Why not get out there and try to spot some of the signs below (remember to wrap up warm as it can still be cold).

The first snow drops.

A busy buzzing Bumblebee.

Birds begin singing in the morning.

Ducklings can be heard chirping.

Apple blossom.

Yellow rows of daffodils.
